

# **DATA SHEET**

## **SURFACE-MOUNT CERAMIC MULTILAYER CAPACITORS**

General Purpose & High Capacitance

Class 2, X7R 6.3 V TO 50 V 100 pF to 22 μF

RoHS compliant & Halogen Free

**YAGEO** Phicomp

#### SCOPE

This specification describes X7R series chip capacitors with leadfree terminations.

#### **APPLICATIONS**

- PCs, Hard disk, Game PCs
- DVDs, Video cameras
- Mobile phones
- · Data processing

#### **FEATURES**

- · Supplied in tape on reel
- · Nickel-barrier end termination
- RoHS compliant
- Halogen Free compliant

### ORDERING INFORMATION-GLOBAL PART NUMBER, PHYCOMP CTC & 12NC

All part numbers are identified by the series, size, tolerance, TC material, packing style, voltage, process code, termination and capacitance value.

#### YAGEO BRAND ordering code

#### **GLOBAL PART NUMBER (PREFERRED)**

CC xxxx x x X7R x BB xxx (1) (2) (3)

#### (I) SIZE – INCH BASED (METRIC)

0201 (0603)

0402 (1005)

0603 (1608)

0805 (2012)

1206 (3216)

1210 (3225)

1812 (4532)

#### (2) TOLERANCE

 $| = \pm 5\%$  (1)

 $K = \pm 10\%$ 

 $M = \pm 20\%$ 

#### (3) PACKING STYLE

R = Paper/PE taping reel; Reel 7 inch

K = Blister taping reel; Reel 7 inch

P = Paper/PE taping reel; Reel 13 inch

F = Blister taping reel; Reel 13 inch

#### (4) RATED VOLTAGE

5 = 6.3 V

6 = 10 V

7 = 16 V

8 = 25 V

9 = 50 V

#### (5) CAPACITANCE VALUE

2 significant digits+number of zeros

The 3rd digit signifies the multiplying factor, and letter R is decimal point

Example:  $103 = 10 \times 10^3 = 10,000 \text{ pF} = 10 \text{ nF}$ 

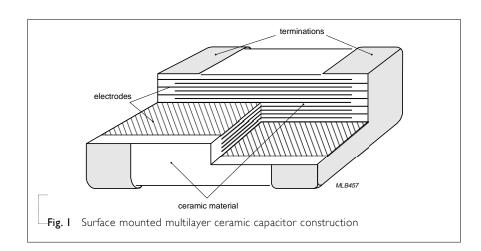

#### NOTE

1. Tolerance  $\pm 5\%$  is not available for full product range, please contact local sales force before ordering

#### **CONSTRUCTION**

The capacitor consists of a rectangular block of ceramic dielectric in which a number of interleaved metal electrodes are contained. This structure gives rise to a high capacitance per unit volume.

The inner electrodes are connected to the two end terminations and finally covered with a layer of plated tin (NiSn). The terminations are lead-free. A cross section of the structure is shown in Fig. I.

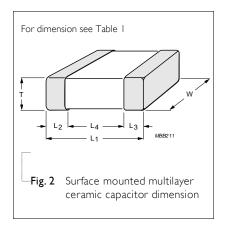

#### **DIMENSION**

**Table I** For outlines see fig. 2

| TYPE | 1 . (mm)            | W (mm)         | T (MM)         | L <sub>2</sub> / L <sub>3</sub> | (mm) | L <sub>4</sub> (mm | ) DIMENSION |

#### **ELECTRICAL CHARACTERISTICS**

YAGEO Phicomp

#### X7R DIELECTRIC CAPACITORS; NISN TERMINATIONS

Unless otherwise specified, all test and measurements shall be made under standard atmospheric conditions for testing as given in 5.3 of IEC 60068-1:

- Temperature: 15 °C to 35 °C - Relative humidity: 25% to 75% - Air pressure: 86 kPa to 106 kPa

Before the measurements are made, the capacitor shall be stored at the measuring temperature for a time sufficient to allow the entire capacitor to reach this temperature.

The period as prescribed for recovery at the end of a test is normally sufficient for this purpose.

#### **TEST TEST METHOD PROCEDURE**

#### Temperature Characteristic

IEC 60384- 4.6 21/22

Capacitance shall be measured by the steps shown in the following table.

The capacitance change should be measured after 5 min at each specified temperature stage.

| Step | Temperature(°C)       |  |
|------|-----------------------|--|
| a    | 25±2                  |  |
| b    | Lower temperature±3°C |  |
| С    | 25±2                  |  |
| d    | Upper Temperature±2℃  |  |
| е    | 25±2                  |  |

(I) Class I

Temperature Coefficient shall be calculated from the formula as below

Temp, Coefficient = 
$$\frac{C2 - C1}{C1 \times \Delta T} \times 10^6 \text{ [ppm/°C]}$$

C1: Capacitance at step c C2: Capacitance at 125°C

 $\Delta T$ : 100°C(=125°C-25°C)

(2) Class II

Capacitance Change shall be calculated from the formula

$$\Delta C = \frac{C2 - C1}{C1} \times 100\%$$

C1: Capacitance at step c

C2: Capacitance at step b or d

### **REQUIREMENTS**

<General purpose series>

Class I:

 $\Delta$  C/C:  $\pm 30$ ppm

Class2:

### REVISION HISTORY

| REVISION     | DATE            | CHANGE<br>NOTIFICATION | DESCRIPTION  |
|--------------|-----------------|------------------------|--|
| Version 20   | Sep. 8, 2020    | -                      | - 0402, 220nF to 470nF, IOV Insulation resistance after I minute at Ur (DC) updated        |
| Version 19   | Aug. 17, 2020   | -                      | - Add 0402/220nF/25V   |
| Version 18   | May. 11th, 2017 | 7 _                    | - Add 1210/10uF/50V  |
| Version 17   | Mar. 7th, 2017  | -                      | - 0805 L4 spec updated   |
|              |                 |                        | - Dimension updated  |
| Version 16   | Dec. 7th, 2016  | -                      | - Dimension updated  |
| Version 15   | Oct. 3rd, 2016  | -                      | - Dimension updated, Soldering recommendation updated                                      |
| Version 14   | May 31st, 2016  | -                      | - Dimension updated  |
| Version 13   | Dec. 30, 2015   | -                      | - Dimension on 0603 and 1206 case size updated   |
| Version 12   | May 26, 2015    | -                      | - 1210, 25V dissipation factor updated   |
| Version I I  | Jan. 06, 2015   | _                      | - 0402, 100nF, 50V Dissipation factor (D.F.) updated.                                      |
| Version 10   | Jul. 08, 2014   | =                      | - Dimension updated  |
| Version 9    | Aug. 19, 2013   | -                      | - Dimension updated  |
| Version 8    | Oct. 13, 2011   |                        | - Dimension updated  |
| V E1 31011 0 | OCI, 13, 2011   |                        | - 50V Dissipation factor(D.F) updated  |
| Version 7    | lan. 13, 2011   | -                      | - Dimension updated  |
| Version 6    | Oct. 13, 2010   | _                      | - Rated voltage of 0201 extend to 50 V   |
|              |                 |                        | - Capacitance range of 0201 X7R 6.3V to 16V extend to 100 pF                               |
|              |                 |                        | - Capacitance range of 0805 X7R 10V extend to 10 μF  |
|              |                 |                        | - Capacitance range of 0805 X7R 50V extend to 1 $\mu F$                                    |
|              |                 |                        | - Capacitance range of 1210 X7R 10V extend to 22 $\mu F$                                   |
|              |                 |                        | - Figures of impedance ESR updated   |
| Version 5    | Jul 27, 2010    | -                      | - Dimension on 0603 and 1206 case size updated   |
|              |                 |                        | - 16V to 25V Dissipation factor(D.F) updated   |
| Version 4    | Apr 21, 2010    | -                      | - The statement of "Halogen Free" on the cover added                                       |
|              |                 |                        | - Dimension updated  |
| Version 3    | Oct 26, 2009    | -                      | - Capacitance range of 0402 X7R 25 V extend to 100 nF                                      |
|              |                 |                        | - 16V Dissipation factor updated   |
| Version 2    | May 11, 2009    | -                      | - Product range updated  |
| Version I    | Apr 24, 2009    | -                      | - Ordering code updated  |
| Version 0    | Apr 15, 2009    | =                      | - New datasheet for general purpose and high capacitance X7R series with RoHS              |
|              |                 |                        | compliant  |
|              |                 |                        | - Replace the "6.3V to 50V" part of pdf files: X7R_10V_9, X7R_16V-to-100V_9,               |
|              |                 |                        | X7R_16-to-500V_9, UP-X5R_X7R_HighCaps_6.3-to-25V_11, UY-<br>X5R_X7R_HighCaps_6.3-to-25V_11 |
|              |                 |                        | - Combine 0201 from pdf files: UP-NP0X5RX7RY5V_0201_6.3-to-50V_2 and UY-                   |
|              |                 |                        | NPOX5RX7RY5V_0201_6,3-to-50V_2   |
|              |                 |                        | - Define global part number  |
|              |                 |                        | - Description of "Halogen Free compliant" added  |
|              |                 |                        | - Test method and procedure updated  |
